

DR. ANDREW C. CAMPBELL

ALTERNATIVE OCCUPATION A racecar driver, as this takes a great deal of precision and mental stamina. While I feel this would be enjoyable, I couldn't see myself in any profession other than the one I am in now **PLACE YOU GO TO ESCAPE THE OFFICE** My lake house, about 20 minutes from my home **I WOULD LOVE TO OWN** The cure to cancer **I WOULD LIKE TO BE REMEMBERED AS** A caring, loving father and husband

FIRST-CLASS TREATMENT

Implementing a philosophy that encompasses **COMPLETE RELAXATION AND REJUVENATION**, Dr. Campbell leaves no stone unturned. Whether it be exemplified by a discreet, post-surgical back entrance connected to a private examination room, computer imaging or aromatherapy, Dr. Campbell's appreciation for comfort and quality proves comprehensive. "I personally administer all injectables and send my facial rejuvenation patients flowers after treatment. It's the little details that make us a **CARING, THOUGHTFUL PRACTICE**." Likewise, all facelift patients receive Obagi products prior to surgery and complimentary facial massages the day of treatment. "I take extreme joy in making my patients smile," explains the kind-hearted surgeon. "Such high-quality service is the keystone of my practice and is upheld through all aspects of care." In particular, Dr. Campbell uses **ENDOSCOPIC TECHNIQUES** with **MINIMAL INCISIONS** to expedite healing, minimize bruising and facilitate quick recoveries. Additionally, patients receive calls after surgery and take comfort in having the staff they interact with during consultations oversee their care in the operating room and post-surgically. "Our mission is to enhance patients' **NATURAL BEAUTY** and impart **'RED CARPET TREATMENT'** to make each patient's experience with us dignified and pleasant."

INSIDE INFORMATION

passion for perfection

Upon entering Campbell Facial Plastic Surgery, patients are immediately put at ease by the facility's posh decor—a reflection of Dr. Andrew C. Campbell's keen attention to detail, regard for patient comfort and unwavering commitment to aesthetic excellence. "When patients enter my facility, I want them to feel like they are anywhere but a doctor's office."

"My appreciation for beauty extends beyond the surgical results I create," says Dr. Campbell of his all-encompassing facilities, located in both Sheboygan and Mequon, a suburb of Milwaukee, decorated with water features, stone, art, plush furniture and an all-glass entrance. The facility includes a medi-spa, Quintessa Medical Spa, and a fully accredited surgical center with two operating rooms. It also features an overnight recovery suite staffed with a registered nurse for after-hour care and is adorned with deluxe spa linens. "I believe patients recover faster when they are comfortable and completely relaxed." To create an overwhelming sense of calm for each of his patients, the second-generation physician works with a caring team devoted to top-notch, one-on-one care, including a private anesthesia provider, who meets with patients prior to surgery to establish intimacy and review anesthesia options.

Like the facility's luxurious accommodations, Dr. Campbell's surgical philosophies seek to augment comfort and complement the center's nurturing environment. "I believe it's important to listen to patients and get a full understanding of their concerns. Detailed preoperative discussions provide the necessary groundwork for customized, aesthetic results." Dr. Campbell also feels that the three-dimensional aspect of facial plastic surgery requires tailored techniques that accommodate patients' unique facial anatomies. "No two procedures are ever performed the same. All treatments are adapted to meet the ideals, expectations, preferences and needs of my patients."
